

DEMO-14 / Registration

**Tc-Reg-001: Password validation fails with weak password.**

Priority	Severity	Behavior	Type
Medium	Major	Negative	Functional
Layer	Is Flaky	Is Muted	Automation
E2E	No	No	To be automated
Status	Milestone	-	To be automated
Actual	-	-	-

**Description**

Verify that registration is blocked when password does not meet security requirements (min. length, character complexity)

Password requirements:

1. Minimum length: 6 characters
2. At least 1 special character
3. At least 1 uppercase letter

**Preconditions**

User is not registered in the system.

**Postconditions**

User is **not** registered in the system

Registration form remains visible with entered data.

**Steps to reproduce**

# Step	Action	Expected Result
1 Open site.	<a href="https://buggy.justtestit.org/">https://buggy.justtestit.org/</a>	Homepage loads successfully.
2 Click "Register" (top-right).		Registration form appears.
3 Enter valid data.	<ul style="list-style-type: none"> <li>• Login: JHwell@32</li> <li>• First Name: Jonathan</li> <li>• Last Name: Hwell</li> </ul>	Field accept input.
4 Enter password shorter than minimum length.	e.g. jnth	Field accept input, no real-time validation error
5 Enter confirm password.	e.g. jnth	Field accept input, no error
6 Click "Register" button again.		Red error message appears indicating password requirements not met.

The screenshot shows a registration form with the following fields filled: Login (jnth), First Name (John), Last Name (Doe). The Password and Confirm Password fields are empty. A red error message at the bottom states: "InvalidParameter: 1 validation error(s) found - minimum field size of 6".
