DEMO-15 / test

Tc-Reg-002: Password mismatch validation.

Priority	Severity	Behavior	Type
Medium	Minor	Negative	Functional

Layer	Is Flaky	Is Muted	Automation
E2E	No	No	Manual

Status	Milestone		
Actual	–		

Description

Verify real-time validation of password confirmation field.

Password requirements:

1. Minimum length: 6 characters
2. At least 1 special character
3. At least 1 uppercase letter

Preconditions

- Valid login/First Name/Last Name entered.
- Valid password entered in "Password" field.

Postconditions

Registration form remains visible.

Steps to reproduce

#	Step	Action	Expected Result
1	Enter valid password.	Jnth@n!23	There's no error.
2	Enter mismatched password in "Confirm Password"	e.g. jOnthn	Error message appears: "Passwords do not match".
3	Correct "Confirm Password" to match original.	Jnth@n!23	Error dissappears.
